

# THE APPLICATIONS

I nostri prodotti sono destinati all'industria petrolifera, chimica e petrolchimica, meccanica con applicazioni onshore, offshore e sottomarine. I prodotti speciali sono progettati dal nostro reparto ingegneria in collaborazione con i nostri clienti e testati nei nostri laboratori od in laboratori esterni riconosciuti. La nostra organizzazione è in grado di garantire la gestione di ogni tipo di progetto, dal primo take off al commissioning finale, in ogni paese del mondo per ogni tipo di prodotto e materiale e con supporto locale, sia commerciale che tecnico.

Our products are supplied to leading international offshore and onshore oil companies worldwide. The industries served by us include refining, oil and gas exploration, petrochemical, chemical, power generation and mechanical industries and applications are onshore, offshore and also subsea. Special products are engineered in our engineering department in collaboration with our clients taking into account their particular requirements and these products are then fully tested in our laboratory or in internationally recognised research laboratories. Our worldwide network of commercial offices are able to offer a complete range of piping components in all grades of material from initial take off to final commissioning, including full technical support where necessary to all of our customers.
